

nq · Connecting Your Meta Ads Account

How to give NQ view-only access to your Meta ad account for reporting — about 3 minutes.

BEFORE YOU BEGIN

Admin access to your Meta Business account — the one that holds your ad account.

Our NQ Business ID: _____ (we'll share this with you)

STEPS

- 1 Find your Ad Account ID**
Open Meta Ads Manager and click the account dropdown at the top. Your Ad Account ID is the number shown beside the account name (also under Business Settings → Accounts → Ad Accounts).
- 2 Open Business Settings**
Go to business.facebook.com and click Settings (the gear icon) to open Business Settings.
- 3 Go to Partners**
In the left menu, under “Users”, click “Partners.”
- 4 Add NQ as a partner**
Click “Add” → “Give a partner access to your assets,” then enter our NQ Business ID (shown above).
- 5 Share your ad account (view-only)**
Select your Ad Account, choose the “Analyst” role (view-only), and click Save / Next.
- 6 Send us your Ad Account ID**
Reply to us with your Ad Account ID from Step 1, and confirm you've added us as a partner.
- 7 We finish the setup**
We complete the connection on our side — nothing more is needed from you.

WHAT NQ CAN AND CAN'T DO

✓ **Can** view your ad performance (spend and results) to build your reports.

✗ **Can't** create, edit, pause, or spend on your campaigns (access is view-only).

✗ **Can't** touch your payment methods or account settings.

You can remove our access at any time in Business Settings → Partners.

Prefer not to use partner sharing? You can instead add our email as a person with the “Analyst” role on the ad account (Business Settings → Ad Accounts → your account → Add people). Ask us for the email.
